PROFILE

Senior product expert with 15+ years in software product management across AI/ML, Fintech, eCommerce, B2B SaaS, and Telecommunications. Proven track record in product delivery, go-to-market strategy, and P&L management for portfolios generating \$100M+ in revenue, in startups to enterprise organizations. Currently focused on driving impact as a senior individual contributor, leading cutting-edge AI/ML product development while balancing deep experience with a growth-oriented and curiosity-driven mindset.

Career Highlights:

- Accelerated delivery of Ibotta's **Machine Learning** capabilities, launching hyper-personalization product features and predictive models that delivered **\$20M in ARR**
- Reversed declining trends in profit and subscriber count at CREDO Mobile, **increasing growth** and margin per customer by **more than 30%**, doubling company valuation and driving successful exit via acquisition in 2021
- **Built and led high-performing product teams 3 times** while leading transformations to product-driven approaches to product strategy, prioritization, customer research, and metrics/OKRs

EXPERIENCE

Sr. Product Manager, AI and Machine Learning, Ibotta

2024 – Present

Lead the AI and Machine Learning product roadmap for Ibotta (NYSE: IBTA), a hypergrowth digital-promotion performance marketing company.

- Spearheaded strategy and delivery of Ibotta's first AI-powered recommender system for strategic partners, driving a 5% lift in conversion and increasing partner ARR by \$5M
- Handpicked by senior leadership to lead top-priority initiative for "AI-powered digital promotions", crafting and executing a value-driven roadmap that delivered 3 ML models focused on optimization on time, surpassing both model accuracy and adoption goals
- Directed cross-functional team for a hackathon initiative aimed at building a superior in-app customer search experience through LLM tech, launching an A/B test against existing search within 90 days, and exceeding performance against existing search with 3rd major product iteration

Vice President of Product, Atlas Primary

2022 – 2023

Senior product leadership for a healthcare research startup. Crafted product strategy to deliver growth and profitability while building a global technical delivery team.

- Developed strategic roadmap focused on innovation through medical foundation engagement, forecast to deliver **a 300% ROI in 18 months**
- Hired and onboarded 8 technical team members, seamlessly transitioning product development from external consultancies to in-house

Chief Technology Officer, CREDO Mobile

2017 – 2021

Product and technology leadership for a Bay Area mission-driven telecommunications company. Hired and developed top-tier technical teams, built a roadmap for product transformation, and led technical innovation.

- Led Product, UX/UI, Software Engineering, Data, IT, Carrier, and Operations teams; scaled department to 60 members with responsibility for \$12 million in budget and driving \$100M in annual revenue
- Drove company-wide product roadmap planning, creating alignment around strategic priorities to deliver growth, doubling development velocity and accelerating from 4 to 10 major releases per year
- Launched new Adobe Commerce eCommerce storefront, enabling A/B Testing and iterative conversion enhancements, delivering a 20% increase to online sales rates within 2 months of launch
- Championed ideation through delivery of Customer Data Platform, leveraging machine learning to enable personalization of content, delivering a 15% increase in buy-flow and upsell conversion

Director of Product Management, ClickBank

2014 – 2017

Led product management and product marketing at leading global eCommerce, performance marketing platform and marketplace company. As a player/coach, grew team of 6 while leading roadmap strategy and execution.

- Defined product strategy and enabled execution for marketplace and eCommerce platform, crafting and delivering against an aggressive roadmap that enabled the company to reach \$500M in annual revenue
- Executed product led growth strategies increasing new creator acquisition by 15%, while expanding marketplace and improving buyer conversion, delivering 10% YoY growth in annual revenue

Technical Product Manager, Cachematrix

2011 – 2014

Directed product strategy, client management, and project delivery for a SaaS and DaaS fintech company providing solutions for cash management and liquidity to many of the world's largest financial institutions.

- Led user research, roadmap development, prioritization, and project delivery for trading and data platform solutions for the banking industry, generating \$5M+ in annual revenue

Product Manager, IHS Markit

2010 – 2011

Led product development for sophisticated integrated and data intensive financial solutions at a fintech focused on designing and developing custom websites, reports, data, and tools for the financial industry.

- Oversaw cross-functional teams of 20 team members to build industry-leading financial research and data solutions for web, embedded (desktop) apps, API, and Mobile (iOS, Android, Blackberry) platforms

Product Manager, Research Now

2007 – 2010

First product manager for a global leader in the market research online data collection domain. Led platform product and feature delivery, and influenced business integration strategy for multiple company acquisitions.

- Delivered quote-to-cash integrated Salesforce, Savvion and PeopleSoft product solution, unlocking an aggressive expansion strategy into European and Asian markets, driving 50%+ YoY growth
